

Software Development and System Integration services for Industrial Control and Embedded Device applications

CK AUTOMATION, LLC

- SYSTEM INTEGRATION
- PROCESS AUTOMATION
- SUPERVISORY CONTROL
- VIRTUALIZATION TECHNOLOGY
- GRAPHICAL USER INTERFACES
- HISTORICAL DATA COLLECTION
- LINUX/QT BASED DEVICES
- EMBEDDED REAL-TIME SOFTWARE

Company Overview

CK Automation is a Buffalo, NY based Woman Owned Small Business (WOSB) Enterprise with expertise in Industrial Systems Integration, Automation, User Interface and Software Development for Embedded Devices and Industrial Applications.

The CK Automation team of highly experienced engineers provides their services on a project-by-project basis with flexible scheduling to suit your specific needs and timelines. Project execution can be performed in any combination of on-site and off-site locations to maximize efficiency and minimize cost.

All CK Automation Engineers are Degreed Professionals from accredited Universities who possess a portfolio of Industrial experience ranging from 15 to 35 years.

As a Systems Integrator and Software Development company, all engineers at CK Automation are expertly adept at the skills of programming, networking, troubleshooting and resolving operational issues. Each team member has additional unique specialty experience with various aspects, products and disciplines within the industry. This makes for a very well rounded group of engineers ready to take on your project !

Areas of Expertise

Industrial Automation and Process Control

- Programmable Logic Controllers (PLC)
- Variable Frequency Drives (VFD)
- Servo Motion Control
- Sensors, Actuators, Barcode Interfaces
- Industrial Networking

Supervisory Control, Data Acquisition, Operator Interface

- SCADA, MES, Historical Data Collection Systems
- Industrial Touchscreen Applications

Real-Time Embedded Software

- Embedded Linux (Yocto, Busybox, Qt)
- Bare Metal and RTOS applications
- ARM and Multicore ARM/DSP Software

Should your project benefit from the expertise of our Engineering Team, please feel free to contact CK Automation to discuss your specific needs and requirements. Our team is looking forward to hearing from you.
